Subject: RE: San Jacinto Webpage Addition Request: NRRB Response SEMS

--Is Alternative 6N expected to remove the material that was leaking from the armored pit after Hurricane Harvey?

Response: Alternative 6N would include removal of all waste material below the EPA action level. This protective action level would include the removal of waste material that was exposed following Hurricane Harvey.

--There's no mention of Hurricane Harvey damage in this document, only theoretical storm events. Are any changes being made to the remedial plan as a result of Harvey damage?

Response: The final remedial plan will be established in the Record of Decision, which will be issued in the near future. The impact of Hurricane Harvey will be considered in any future decisions.

--The document notes potential exposure for future construction workers at the site. Are the PRPs' workers, who are currently repairing the armored cap, required to wear any personal protective equipment?

Response: All workers at the site are covered under a site-specific health and safety plan that dictates the appropriate level of personal protective equipment based on the activities that are being performed.

--Is the interim remedy currently installed at the site considered to be protective of human health?

Response: The interim remedy is designed to be protective until a final remedy can be completed at the Site. Repairs recently conducted on the temporary armored cap, and the current sediment sampling will verify that the cap is functioning as intended.

This reporter has questions about the new document that you posted. Her deadline is 2 pm today.

Hi David,

I do have a few questions about this document, now that I've been able to read it. Please see below:

- Is Alternative 6N expected to remove the material that was leaking from the armored pit after Hurricane Harvey?
- There's no mention of Hurricane Harvey damage in this document, only theoretical storm events. Are any changes being made to the remedial plan as a result of Harvey damage?
- The document notes potential exposure for future construction workers at the site. Are the PRPs' workers, who are currently repairing the armored cap, required to wear any personal protective equipment?
- Is the interim remedy currently installed at the site considered to be protective of human health?

My deadline for these is 2 p.m. Eastern time. Feel free to call if you prefer.

Best,
Sylvia

Subject: San Jacinto Webpage Addition Request: NRRB Response SEMS

Hi David,

Superfund is requesting to add the link to the Region 6 Responses to the National Remedy Review Board (NRRB) Recommendations for San Jacinto Memorandum to the site webpage. There will be a number of other edits later as we move toward the ROD. You can find the document below. Please let me know if this is all right, and I'll get it up.

<https://semspub.epa.gov/src/document/06/100003692>

link is now live on the web.

The document will be included in the searchable table on this page

<https://www.epa.gov/superfund/national-remedy-review-board-nrrb>

when the json file is manually updated --- typically daily.

Soon the json file process will be automated.

Hi Ross,

Per my email yesterday, can you please coordinate with R6 to get the San Jacinto NRRB response on the NRRB website? The SEMS DocID is provided below.

Thanks!

Christine

Mr. Meyer,

I did not know you were waiting on the Doc Id. The document dated 10/02/2017, is Doc Id 100003692. The pdf should be viewable in SEMS shortly. I can send you a pdf copy if you would like. Please let us know if you have any questions or concerns.

Thanks,

Sharon Martin

Christine,
We just sent the NRRB memo in this morning to be filed in SEMS. As soon as we get a DOCID we can share with you and Ross.

Subject: NRRB Response SEMS

Hi John,
I want to make sure we get the NRRB response live (as long as you're good with that). Ross Gilleland is my contact to get NRRB documents online. Who can I connect him with in the Region to coordinate getting the SEMS document number and get it online?
Thanks!
Christine
